

# 2mm Double-Row Connector (Product Compliant to UL/CSA Standard)

## DF11 Series

### ■ Features

#### 1. Space-saving on Board Realized

Double rows of 2mm pitch contact has been condensed within the 5mm width.

The multiple number of signals can be secured in the same space as the conventional 2mm single-row contact.

#### 2. Broad Variation

The insulation displacement and crimping methods are prepared for connection. Thus, board to cable, in-line, board to board connectors are provided in order to widen a board design variation.

In addition, "Gold" or "Tin" can be selected for the plating according application, while the SMT products line up.

#### 3. Applicable Wire Covers Wide Range

According to the double rows of 2mm pitch compact design, the applicable wire can cover AWG22 to 30.

#### 4. The ID Type Connector Achieves Connection Work.

Using the full automatic insulation displacement machine, the complicated multi-harness can be easily connected, reducing the man-hour and eliminating the manual work process.

## ■ Features of DF11 Insulation Displacement Machine (Single Core Punching Full Automatic ID Machine AM700/DF11)

### ● 5 Major Features of ID Machine AM700/DF11

1. Perform the multi-harness.
2. The setup time has been widely reduced. (10 minutes maximum)
3. Space saving design.  
 (About half space compared with the conventional machine)
4. Minimize initial cost with low cost.
5. The harness data can be saved in the floppy disk and easily changed.

## ■ Points

Since the DF11 insulation displacement allows double rows ID with a single part, the harness service is completed with machine connection only.
